Manage Emergencies and Incidents

Keeping your employees and customers safe is the top priority for Master Lightning Security. In order to ensure that our officers respond appropriately to an emergency our Guard Reporting App uses 3 functions to help ensure proper response: 1) An incident checklist that guides officers through an emergency; 2) Digital post orders that provide detailed response actions; and 3) Real time review of incident reports.

05/

Minimize Liability

Our Security Guard Reporting App helps reduce your liability by allowing you to accurately document the management of any security related matters. 06/

Real Time Monitoring

Our systems are designed to prevent costly losses such as vandalism, theft, corporate espionage and damaging accidents. You can see our officers in real-time as they patrol your property right from our client web portal.

Some of the reports you will have access to online:

Daily Activity Reports

Incident Reports

Maintenance Reports

Master Lightning Security takes advantage of today's technology to integrate it with security and provide a faster, more reliable service.

We combine mobile and web-based technology gy with our human resources in order to provide top quality security for your assets. Our reputation as a solid security company, is thanks in part to our use of hardware and software that allow us to better serve you. These technologies give us the opportunity to excel by improving the following aspects of our services:

Real-time tracking of our guards and supervisors.

Digital reports and logs delivered over the web with 24x7 access.

GPS Location-based guard logging.

QR codes used to create guard tours in your location.

Sophisticated software that allows managers to oversee guards effectively.

As a First Shield Pro partner, you benefit from our use of technology. To mention a few, here are some of your gains:

01/

02

Minimize paperwork

Simply log into our client portal to review all security reports and log.

03/
